

Stainless Steel Fire Extinguisher Floor Stand

Information

The Hercules stainless steel fire extinguisher stand was designed with both aesthetics and safety in mind.

This stand will comply to the SCDF requirement of Singapore Standards 578 Clause 1.7.7 :

“ Free-standing extinguishers may be placed on the floor if these extinguishers are designed for such form of placement on appropriately designed support to prevent accidental dislodgement.”

The stainless steel 316, stylish 2B finish ensures a very high level of resistance to rust, weather elements and time. Rounded corners on all 4 corners effectively prevent cuts.

The floor stand is designed to be placed in offices and retail stores that want a luxurious feel to their workplaces.

No installation or drilling is required. Simply place it on the floor. With a fire extinguisher, the total weight becomes around 8-9kg which makes it very difficult to accidentally move.

IPOS Patent Design No. 30202300423Y
 Date of register 12 April 2023
 Owned by FIRE ARMOUR PTE LTD

SIZE	Opening Diameter	Height	Part No
2KG	115mm	430mm	BX-SS-C2SS
3KG	140mm	430mm	BX-SS-C3SS

*The Hercules floor stand will also loosely fit other fire extinguishers with a diameter smaller than the diameter of the opening.
